the **2Work** device cleaning range

Some shocking facts...

- The average toilet seat harbours 40 germs per square inch. This average desk top is 100 times!
- Telephones carry most germs, with up to 20,000 per square inch.
- Especially those in 10,000 residences and a house is home to over 1,000.

Despite the dangers, a regular cleaning routine with the right product can remove germs, dirt and grease.
